Page numbers of errata are in *italic*.

- Aggregation, protein, thermomechanically induced and starch structural changes in wheat flour dough, 89
- γ -Aminobutyric acid (GABA), salt stress and accumulation of in germinated foxtail millet, 145
- α -Amylase, triticale quality, carbohydrate properties, falling number and, 594
- Amylopectin, two-directional backbone model of, 294
- Amyloplast development, effect of high night temperature during grain filling on in japonica rice, 114
- Anticaking effect, of Ronozyme WX xylanase on wheat substrates, visualization of, 439
- Antioxidants
 - in germinated, popped, and cooked huauzontle seeds, 263
 - germinated brown rice and, 601
 - of glutinous black rice, effect of milling on, 552
- AOAC method 2009.01, measurement of total dietary fiber using, 396, 515, 517
- Arabinoxylans
 - cross-linking in cereal and pseudocereal grains by dehydrooligomers of ferulic acid, 507
 - variability of in hard spring wheat, 240
- wheat, structure of provides insight into function, 387
- Aspergillus oryzae*, solid-state fermentation of for nutritional enhancement of soy meal, 529
- Attenuated total reflectance (ATR) FTIR spectroscopy, for study of impact of bran addition on water properties and gluten secondary structure in wheat flour doughs, 377
- Barley (*Hordeum vulgare*)
 - hull-less, removal and isolation of germ-rich fractions from using Fitzpatrick comminuting mill and sieves, 546
 - lower 30 minute serum insulin in healthy Sprague-Dawley rats consuming chips from specific flour blends, 474
 - nuclear magnetic resonance and differential scanning calorimetry studies of water mobility in dough systems containing flour from, 120
- Bioplastics, developments in the science of zein, kafirin, and gluten protein in, 344
- Biscuits (semisweet), impact of puroindolines on quality of, 564
- Bran
 - impact of addition of on water properties and gluten secondary structure in wheat flour doughs, 377
 - wheat, free radicals generated on by electron beam, 469
- Buckwheat (*Fagopyrum esculentum*), genotypic variation in nutritional composition of groats and husks, 132
- Caging effect, Ronozyme WX xylanase, wheat substrates and, 439
- Cake, chiffon, influence of microbial transglutaminase on baking characteristics of, 463
- Carbohydrate properties, triticale quality, falling number, α -amylase and, 594
- Carbon dioxide injection rate, waxy rice, effect on characteristics of extruded pellets and vacuum-puffed *yukwa*, 157
- Carboxymethyl starch (CMS), preparation and structure characterization of under ultrasonic irradiation, 24
- CDS. *See* Condensed distillers solubles
- Cereal grains, dehydrotriferulic and dehydrodiferulic acid profiles of, 507
- Chalky grain, correlation with rice grain weight and milling quality, 587
- Char siew bao, made from Australian soft wheat, wheat quality requirements for, 231
- Chinese white salted noodles, relationship between physicochemical properties of wheat flour, wheat protein composition, and textural properties of, 419
- CMS. *See* Carboxymethyl starch
- Color
 - of glutinous black rice, effect of milling on, 552
 - rice, effect of nighttime air temperature on, 218
- Condensed distillers solubles (CDS)
 - effects of varying levels of on flowability properties of DDGS, 35
 - quantification of physical and chemical properties, and identification of potentially valuable components from, 70
- Cooling procedures, effect on rice milling quality appraisals, 107

Corn. *See* Maize

Corn starch, preparation and structure characterization of under ultrasonic irradiation, 24

- DDGS. *See* Distillers dried grains with solubles
- Degree of substitution (DS), increasing in carboxymethyl starch, 24
- Dehydrotriferulic and dehydrodiferulic acid profiles, of cereal and pseudocereal flours, 507
- Deoxynivalenol, estimating content in ground oats using VIS-NIR spectroscopy, 181
- Differential scanning calorimetry studies, of water mobility in dough systems containing barley flour, 120
- Digestion, location of, starch quality and, 335
